Note : Returns from April 2016 for CIS

*** CIS, a Collective Investment Scheme, a pooled investment vehicle registered with the FSCA

INVESTMENT OBJECTIVE

The fund is a Qualified Investor Hedge Fund, aiming to provide investors with equity like real returns that are uncorrelated to the fortunes of the South African capital markets.

The benchmark of the portfolio will be the STeFI Composite Index. The investable universe of the fund includes listed equities, property collective investment schemes, property loan stock, real estate equity, money market instruments, bonds, fixed deposits, and other interest bearing securities, derivatives, and assets in liquid form. The fund may also invest in participatory interests or any other form of participation in portfolios of collective investment schemes. The fund may, from time to time, invest in, or enter into, listed and unlisted financial instruments. The investment manager may make foreign investments. The fund's leverage is limited to 4 times the total net asset value of the fund, at any given moment. As additional mandate stipulations, the fund prioritises capital growth, over the long term, and limits downside risk, over the short term. In addition, the fund targets returns in excess of CPI + 4%, over any 36 month period, at moderate levels of volatility. Effective equity exposure ranges between 50% and 80%. Foreign exposure is limited to 25%. The fund can take on debt, to fund investments. The effective exposure is the net position, taking long and short positions into account. A short position results from selling securities that the fund borrows, in the belief that the price will go down, which will allow the fund to buy the securities at a lower price than what it sold it for.

INVESTMENT APPROACH

Our investment process is firmly rooted in fundamental analysis. Our approach is predominantly bottom-up and sector agnostic. Key investment criteria include:

- Quality of management;
- Good corporate governance and transparency;
- Cashflow and balance sheet strength;
- Business strategy and sustainability of business model;
- Attractive valuation.

Risk Terminology

Max Drawdown	The maximum loss from a peak to a trough before a new peak is attained. Maximum Drawdown (MDD) is an indicator of downside risk over a specified time period
Standard Deviation (Std Dev)	A measurement of dispersion about an average. When a fund has a high standard deviation, the predicted range of performance is wide, implying greater volatility.
Sharpe Ratio	A measure of risk-adjusted performance. Calculated by dividing the annualised excess returns over the risk-free rate by Std Dev.
Beta (Bear and Bull)	Bear/(Bull) Beta is a relative measure of the sensitivity of the fund's return to negative/(positive) changes in the benchmark return. It shows to what extent negative/positive periods of performance of the fund are reflected by corresponding negative/positive periods of performance in the benchmark.

PPORTFOLIO MANAGER FUND COMMENTARY

2018 marked the first year since the global financial crisis of 2008 that the South Africa equity market as measured by the SWIX and All Share indices lost ground. For the year the SWIX lost 11.7%. while the All Share index declined by 8.5%. Our fund retreated by 5.5% for the year of which 2.1% was lost in the final quarter. During both periods we performed better than the market though we did not meet our objective of delivering a positive result at worst.

Much of the market's decline for the year was due to the poor performance of historically defensive companies such as British American Tobacco, MTN and Aspen, while the biggest detractor was Naspers. We were not exposed to BTI or MTN but did own Aspen and Naspers. We continue to hold both. Naspers as a secular growth business. Aspen for a recovery to more reasonable levels as we are of the opinion the sell-off was overdone even though the growth thesis has deteriorated substantially.

As to positioning, the fund continues to be biased to a recovery in South Africa about which we have written all year. We have been wrong (we think early) but continue to expect a sustained recovery as corruption is rooted out and we start the process of rebuilding institutions, infrastructure and productive capacity. Given that this is an election year we expect heightened volatility as we approach the national election in May. We further expect president Ramaphosa and the ANC to win decisively, which we think will result in much quicker and more decisive steps from the president post the election.

As at year end the fund had a net exposure of 64% and gross exposure of 98%. Both measures are towards the middle of our historical ranges and we expect this will remain true as we approach elections.

Investment Manager

Mazi Asset Management (Pty) Limited (the 'Investment Manager') incorporated under the laws of South Africa, is an authorised financial services provider (FSP 46405) under the Financial Advisory and Intermediary Services Act 37 of 2002 and has been appointed by Novare CIS as the Investment Manager of the Fund. Contact details: P.O Box 784583, Sandton, 2146, South Africa. Telephone: 010 001 8300. Email: info@mazi.co.za.

The investment manager is a member of the Association for Saving and Investment South Africa. Additional Information on the proposed investment is available on the Investments Manager's Website www.mazi.co.za

The fund is priced monthly and prices are not published.

DISCLAIMER

Collective Investments are generally medium to long term investments. Actual investment performance will differ based on the initial fees applicable, the actual investment date, the date of reinvestment and dividend withholding tax.

Novare CIS does not provide any guarantee in respect of capital or the return of a portfolio. The value of participatory interests may go down as well as up and past performance is not necessarily an indication of future performance.

Collective Investments Schemes trade at ruling prices and can engage in borrowing and scrip lending. Commentary or any forecasts contained in this document are not guaranteed to occur.

Novare CIS has the right to close the portfolio to new investors to manage it more efficiently in accordance with its mandate. The higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. Novare CIS's schedule of fees and charges is available on request.

The portfolio was established as a Collective Investment Scheme in April 2016, all information prior was in an unregulated environment.

The portfolio will not change its investment strategy or investment policy without prior approval from the Financial Sector Conduct Authority and investors. The portfolio does use the services of a prime broker and as a result the fund is exposed to the prime broker counterparty risk. The liquidity risk management policy is available on request.

This document is for information purposes only and does not constitute or form any part of any offer to issue or sell, or any solicitation of any offer to subscribe for or purchase any particular investment.

Whilst reasonable care has been taken in ensuring that the information contained in this document is accurate, neither the Management Company nor the Investment Manager accept liability in respect of damages and/or loss (whether direct or consequential) or expense of any nature which may be suffered as a result of reliance, directly or indirectly, on the information in this document.

Nothing in this document will be considered to state or imply that the Fund is suitable for a particular type of investor.

The Management Company and the Investment Manager have entered into a co-naming agreement regarding the administration of the co-named Fund. The Management Company retains full legal responsibility for the co-named Fund and performs risk management over the portfolio.
